RTInsights is an independent, expert-driven web resource for senior business and IT enterprise professionals in vertical industries. We help our readers understand how they can transform their businesses to higher-value outcomes and new business models with AI, real-time analytics, and IoT. We provide clarity and direction amid the often confusing array of approaches and vendor solutions. We provide our partners with a unique combination of services and deep domain expertise to improve their product marketing, lead generation, and thought leadership activity.

Cloud Data Insights is an independent, expert-driven web resource for decision-makers, senior business leaders, enterprise IT professionals, and practitioners with an interest in cloud data. We help our readers understand how cloud data insights can help transform their business. We address the opportunities and challenges of embracing a cloud data model and focus on the migration, governance, security, architectural, and integration issues. Critically, we provide clarity and direction amid the often-confusing array of approaches and vendor solutions. And we support our partners with a unique combination of services and deep domain expertise to improve their product marketing, lead generation, and thought leadership activities.
